

THE 4th VACCINE RENAISSANCE CONFERENCE

University of Rhode Island

SAVE THE DATE
October 21 - 23, 2010

Don't miss the **Best New England Region Vaccine Event** scheduled for this fall!

Registration is free but space is limited at the [4th Vaccine Renaissance Conference](#), to be held in beautiful Downtown Providence, Rhode Island. The organizers have developed an interactive program with ample time for the exchange of ideas among experts in vaccine research, vaccine delivery, clinical trials and basic immunology.

Last year, participants said this: “. . .I learned something new from nearly every presenter and from nearly every conversation” and “the size of the group facilitated an intimate interplay between speakers and audience . . . “loved the mixture of academic and industrial”. . . “ your staff did an excellent job of taking care of logistics and making everyone feel welcome”. No cost for registration but **pre-registration** is encouraged as space is limited.

This year – we'll be talking about **new models** (fully human-immune system reconstituted mice), **new ideas** (heterologous immunity) and **new vaccines** (breast cancer vaccine). Also to be presented: the current status of **HIV vaccine research** (perspective from the NIH), new models for **monkeypox vaccine efficacy testing**, an update on therapeutic cervical cancer vaccine clinical trials, and new methods for vaccine delivery.

This is one of the region's most talked about vaccine conferences! Nationally recognized researchers and members of the vaccine development industry will attend. Submit your abstracts and plan to learn new things about vaccine research and development . **Poster abstract submission information provided below**.

VACCINE RENAISSANCE IV - SPEAKERS:

- Vincent Tuohy, Ph.D. Cleveland Clinic Lerner Research Institute: Prophylactic Breast Cancer Vaccination
- Katharine Kripke, Ph.D. NIH: Current Status of HIV Vaccine Research
- Manon Cox, MBA. Protein Sciences Corporation: Update on Recombinant Influenza Vaccine
- Alan Cross, M.D. Professor of Medicine: The University of Maryland: Anti Sepsis Vaccines
- Annie De Groot, M.D.: Multipathogen Vaccine Development for WMD Defense Preparedness
- Les Dupuy, Ph.D. USAMRIID: Anti-Ebola Vaccine Development
- Niranjana Sardesai, Ph.D.: Inovio Pharmaceuticals –Therapeutic HPV Vaccine Development
- David Weiner, Ph.D. University of Pennsylvania: DNA Vaccines: Ripe for Delivery

WHEN: Thursday, October 21 - Saturday, October 23

WHERE: Day 1: [URI Feinstein Campus \(Downtown Providence\)](#) University of Rhode Island

Day 2-3: [Hotel Providence](#) - 139 Mathewson Street, Providence, RI 02903
